PROGRAMMING LANGUAGES

JavaScript & NodeJS - ★★★★☆
HTML + CSS/Tailwind - ★★★★☆
TypeScript - ★★★★☆
Python - ★★★☆☆
Java- ★★★☆☆
PHP - ★★☆☆☆
C# - ★★☆☆☆

HUMAN LANGUAGES

German (Native)
English (C1)
WIP: Norwegian

HOBBIES

Reading, Programming, Statistics, Playing The E-Guitar, Learning Languages and Gym.

RESUME

My name is Marcel Kremer and I'm a 24 year old software engineer with a passion for programming. I started my programming journey when I was 13 years old and never stopped learning ever since. As such, I have dabbled in a variety of different areas: Low-Level Programming, Frontend, Backend, Mobile & Desktop Development, Server management and game development. I have found myself to always return to Web Development though, which I have done professionally for most of the time so far. Apart from that, I started a degree in Computer Science via studying at a remote university which is currently on hold.

My strongest languages as of now are JavaScript, NodeJS, Python, TypeScript and Java. Even though JavaScript may not be the most popular language, I still find it quite comfortable to work with. Other languages I have worked with so far include C, C++ and PHP.
In the past I have developed an API wrapper for the ElevenLabs API before there was an official solution.

For the future I am particularly interested in writing software that actually makes a difference. I love working on complex problems and owning them, which is one of the reasons why I'm part time self employed. Knowing that I myself am responsible for a specific problem is something that intrigues me.
My experience includes working with SQL databases, various analytics tools and various JavaScript frontend libraries (React, Vue, Svelte, shadcn, ...). I am also a huge Linux fan and have been using it non-stop on both servers and desktop computers for 4 years now (mostly the Debian universe).

My non-technical hobbies include playing the e-guitar, learning languages (e.g. Norwegian, but generally interested in linguistics, especially obscure languages like Latin or Middle-English), reading (I love reading about different mythologies and a bit of philosophy), going to the gym, taking my dog for a walk and the occasional TV show or video game. More on GitHub.

SKILLS / STACKS / TECHNOLOGIES

Databases:	**Libraries:**	**Libraries & Tools:**	**Workflow**
MySQL / MariaDB	React	OpenGL	Git
MinIO / Object storage	NextJS	Matplotlib	Docker & PM2
PostgreSQL	TanStack	Nginx	GitHub Actions CI/CD
Redis	Express & Fastify	Better Auth	Gitea / GitLab
Elasticsearch	Electron	Stripe	Jira, Confluence, Slab & Linear
Prisma	Jest & ESLint	Tolgee	Grafana
IDEs:	EJS	imgproxy	GitKraken
VSCode	Vite	PostHog	NPM & Bun
Visual Studio	DiscordJS	Umami / Google Analytics	Webhooks

CV – Marcel Kremer

Work

2023-2023	Eshop Guide GmbH	Fullstack Web Developer (Shopify / React / SCSS / NodeJS)
2023-2024	Backwinkel GmbH	Fullstack Developer (Java / ElasticSearch / Twig / PHP) / E-Commerce (OXID eShop)
2024-2024	Netmountains Group GmbH	Fullstack Developer (NodeJS / React / Tailwind / Redux)
2025-now	Self Employed / Contractor	Fullstack Developer / Websites (NodeJS / React / Tailwind / Wordpress)

Education

2023-2026	Computer Science @ AKAD University of Applied Sciences
2020-2022	Vocational School, Technical diploma @ HBU Unna

Company projects:

Netmountains: Developed a provider credentialing and certification platform for healthcare institutions, seeking reimbursement eligibility with statutory health insurer.

Freelancing: Website projects for smaller companies in the area using NodeJS and React. Building own B2B and B2C software projects.

Eshop Guide: Built various Shopify shops and added customizations for larger companies in Germany, added and integrated Shopify apps.

Backwinkel: Continued developing the web shop for school supplies, improving security and speed.
